The 3 W's of Sensory Integration

What is it? What does it look like? and What can we do to help children?

Ernie will share his experiences and findings about Sensory Integration so that we can recognize the signs and implement strategies that will help the child, their teacher, and the parents. Practical ideas and explanations are at the centerpiece of this workshop.

Little Lab:

The Science of Seeds

Get some great ideas for your summer seed/gardening unit and other summer Science and Math ideas. Learn how to help children discover their world and become expert problem solvers and critical thinkers all at the same time! Hands-on activities you can take to and use in your classroom. We will also talk about adding literacy to the Science discovery.
